

Arthur Seaman

Captain Arthur Seaman currently serves as Product Manager, Government and Compliance for Sea Machines Robotics based in Boston, MA. After spending nearly a decade at sea working his way up from cadet to chief mate on several different types of tankers in the government and commercial sector, he came ashore to join the maritime tech startup. Artie heads all compliance activities within the company working with governing bodies and classification societies alike to achieve product type approval and compliance. He helps spearhead the company's international policy discussions surrounding marine autonomy and was one of the captains on the autonomous Tug Nellie Bly for its 2021 Machine Odyssey around Denmark.

Artie holds an unlimited master mariner's license and is an approved USCG STCW instructor. He has a Bachelor of Science in Marine Transportation from SUNY Maritime College and an MBA from Southern New Hampshire University.
