

### **Pascal Rhéaume – Corporation des pilotes du Bas Saint-Laurent**

Captain Rhéaume holds a diploma in navigation from the Institut maritime du Québec. He obtained his master's certificate and sailed aboard various commercial vessels until 2006. He joined the Corporation of Lower St. Lawrence Pilots (CLSLP) in 2008 and became a Class "A" pilot in 2016. He also acts as a training pilot at the Maritime Simulation and Resource Centre and, since 2018, sits on the CLSLP technical committee.

Captain Rhéaume is also involved as an expert pilot in a project for the use of new bathymetry, surface current and tidal standards (S-100 standards), awarded by the Canadian Hydrographic Service (CHS). This project will provide mariners with access to additional information and greater versatility in the display of these data.
